# About Us

## 25 Years of Precision Engineering for Orthopedic Surgery

OrthoMed Surgical Implants was founded in 1999 by biomedical engineers and orthopedic surgeons united by a single conviction: patients everywhere deserve implants manufactured to the highest international standards at a price that makes global healthcare achievable. Today we export to 40+ countries across Europe, the Middle East, Africa, Asia and the Americas.

## Our Mission

To engineer and deliver orthopedic implants that restore mobility, reduce pain and return patients to independent life — manufactured with integrity, supplied with transparency, supported with expertise.

## Manufacturing

Our cleanroom facility operates to ISO 14644 Class 7 standards. CNC machining centres holding ±0.002 mm tolerances produce implant components from certified billets with full chemical and mechanical traceability. Every batch undergoes dimensional inspection, surface finish measurement, biocompatibility testing and sterility validation before release.

## Certifications

- ISO 13485:2016 — Quality Management System
- CE Mark — EU MDR 2017/745 (Class IIb and III)
- FDA Establishment Registration
- WHO GMP Guidelines
